Project Title: Balisong Microsite

I would want to build this site as a few pages, one for the introduction to what a balisong is, one for it's usage in video games, one for those who want to learn more tricks or see tricks preforme, lastly one for different brands and where you could purchase one of your own. Site navigation along the top to keep it simple. There will be many videos whether I take them or from online that I can borrow from and there are multiple games that have used balisongs.

- Home Page/Intro - Have a short introduction to where the balisong came from and what it's overall usage is.
- Different Brands
- Tricks page
 - Beginner
 - Intermediate
 - Advanced
- Video game References
- Sources – list sources that I used for the information when researching my topic as well as where I got the images/videos for the tricks.
